PRESIDENT'S CORNER

SMSHE has many exciting educational presentations and special events scheduled for the coming year. These events will be informative and educational, as well as entertaining.

The AIA Health Facilities Planning Seminar will take place this week (March 26-17) in Grand Rapids Michigan. The ever-popular SMSHE Schmooze will precede the conference at 9:00pm, Wednesday, March 25 at the B.O.B. See Page 3 for more details.

I am also very excited to announce the educational presentation for Wednesday, April 8. Mr. Michael A Canales, a 28 year Healthcare Engineering Professional, will be providing an educational presentation on "Computerized Maintenance Management Systems and Why They Fail." This is going to be an excellent presentation and well worth attending. Mr. Canales will discuss some of the following topics associated with Computerized Maintenance Management Systems (CMMS):

- What are you currently using your CMMS for?
- What would you like to use it for?
- Does your staff see the CMMS as an invaluable tool or as a task master?
- Do you have any examples of how your CMMS is helping you to innovate your healthcare system?

Mr. Canales will also provide an update on the Healthcare Facilities Leadership (HFL) degree program from Owensboro College. This degree program is designed to will support current healthcare facilities leaders in their roles as well as educate our future healthcare facilities leaders.

Also coming on May 13, SMSHE will be sponsoring a Healthcare Engineering Panel Discussion. This discussion will center on challenges faced in healthcare today, energy, and any other thoughts on your mind as they relate to healthcare. Please bring your questions to this presentation for our panel to discuss.

I look forward to seeing all of you at our upcoming events. If you have the opportunity, please inform your colleagues and other healthcare professional on the benefits that SMSHE can offer them. Also encourage them to join this wonderful organization. Please remember that, if you're a current member of ASHE, your ASHE membership number is all that you need to become a valued member of SMSHE.

Have a safe and enjoyable spring and take advantage of all life has to offer.

Tim Rowlett CHFM, SMSHE President

Director, Engineering and Operations for JLL@BHS

Mike Canales

Mike Canales is a 28 year Healthcare Engineering Professional, who has worked as a Healthcare Facilities Director for 21 years. He is currently serving as the program director for the first of a kind Healthcare Facilities Leadership degree. Michael has been an ASHE member for most of his career, earned his CHFM certification in 2003, and is a founding member and past president of the Virginia Society of Healthcare Engineers (VSHE). He has developed expertise in Clinical Engineering, Maintenance & Plant Operations, Security, Emergency Management, Project Management, Environmental Services, Telecommunications, Public Water Works, Leadership Development and Education.

Computerized Maintenance Management Systems (CMMS) and Why They Fail

Optimizing Computerized Maintenance Management Systems – During this interactive presentation, an overview of the challenges and opportunities of implementation, integration, and optimization of computerized maintenance management systems will be experienced. Mike will combine his experience, research, and HFL program instruction to inspire, challenge, and entertain on one of the most underutilized systems in the healthcare facility management profession. To prepare for the presentation, ponder the following:

1. What are you currently using your CMMS for?
2. What would you like to use it for?
3. Does your staff see the CMMS as an invaluable tool or as a task master?
4. Do you have any examples of how your CMMS is helping you innovate?

Mike will also present an update on the Healthcare Facilities Leadership (HFL) degree program.
